ABOUT ME

I am a dedicated Tech Lead with over 5 years of experience in software development. My passion for learning and tackling new challenges has allowed me to lead teams effectively and deliver high-quality, scalable solutions. As a quick learner and autodidact, I continuously seek opportunities to innovate and drive success.

WORK EXPERIENCE

Team Lead Software Developer | Matrix, Israel

2023 - Present

- Leading a team of developers to build the Central Bureau of Statistics portal using C#, .NET Core, Angular, and SQL.
- Integrating Umbraco CMS, enhancing content management efficiency.
- Streamlining deployment processes using Jenkins, reducing release times.
- Collaborating with cross-functional teams to drive key development decisions and deliver high-quality solutions.

Full Stack Developer | LS Technology, Israel

2022 – 2023

- Reimplementing Tabit legacy system functionality into the current version of Backoffice using .NET Core and Angular.
- Maintaining and refactoring old codebases to improve performance and maintainability.
- Working extensively with TypeScript, SQL, C#, Microservices, and Java, applying OOP principles.
- Enhancing system efficiency, reducing load times.

Full Stack Developer | eTeacher Group, Israel

2020 – 2022

- Rewriting old user systems originally developed in ASP Classic using Angular and .NET Core with microservices.
- Maintaining and updating legacy Backoffice systems to the latest versions.
- Utilizing TypeScript, Angular, SQL, C#, and Microservices to deliver robust applications.
- Improving user experience and system reliability, increasing customer satisfaction.

Full Stack Engineer | Biskits Technologies LTD, Israel

2019 – 2020

- Developing the B360 System for business management from scratch, featuring online form creation, HR services, site management, and more.
- Designing and developing complex, user-friendly interfaces from scratch in collaboration with the design team.
- Utilizing TypeScript, Angular, Node.js, Express, and MongoDB to build scalable solutions.
- Contributing to increasing the client base through enhanced product offerings.

PERSONAL PROJECTS

AskBot - AI Chat Assistant
Website: askbot.co.il

- Enabled tailored responses, adaptable workflows, and personalized experiences suitable for various industries.
- Improved customer engagement by 35% for users of the platform.

Synca - Automation Solution
Website: synca.co.il

- Created an automation solution for inventory and eCommerce synchronization.
- Increased efficiency by 40% through automated updates and order processing.
